

Acme Payments

A fictional vendor review, from intake to proposed controls.

Sample recommendation: approve with controls

Moderate weighted risk driven by payment data access, incomplete security assurance, and missing price benchmark.

30.98

WEIGHTED RISK / 100

Moderate

RISK LEVEL

69.44

CONFIDENCE / 100

Intake

Field	Recorded value
Vendor domain	acmepayments.example
Business unit	SuiteScrape
Requested service	Payment orchestration and subscription billing analytics
Proposed contract	\$36,000 / 12 months
Data access / urgency	payment / expedited

Decision remains with the customer

All three required approvals are pending. The five proposed controls are not completed. The sample workflow record is marked resolved; that describes record closure, not procurement approval.

All sources in this example are placeholders. Scores and recommendations illustrate the output format; no real vendor was investigated, cleared or approved.

Evidence-linked scores

Recorded domain scores: 0 means no observed risk; 100 means maximum observed risk. These fictional values are copied from the committed example.

Domain / score	Recorded rationale	Evidence ID
Cybersecurity / 45	Assurance incomplete.	ev_cyber_001
Data privacy / 58	Payment metadata requires DPA.	ev_privacy_001
Sanctions / 5	No hit in supplied evidence set.	ev_sanctions_001
Litigation / 18	No material litigation found.	ev_litigation_001
Financial stability / 35	Limited financial evidence.	ev_financial_001
Operational dependency / 28	Exit path available.	ev_dependency_001
Geographic / 12	No elevated jurisdictional exposure.	ev_geo_001
Commercial / 32	Benchmark required.	ev_commercial_001
Reputation / 20	No severe reputation issue.	ev_reputation_001

Missing evidence

- 1. Completed security questionnaire
- 2. DPA
- 3. SOC 2 or equivalent
- 4. Price benchmark

Residual risk remains moderate in the sample. Human review must resolve the evidence gaps and approval requirements before any real procurement decision.

Controls and approvals

Five proposed controls, each with an owner and a decision gate.

Proposed control	Owner	Due before
Execute DPA or equivalent privacy terms	legal	Contract signature
Complete vendor security questionnaire	security	Production access
Collect SOC 2 Type II or equivalent assurance report	security	Production access
Add breach notification clause with 72-hour notice window	legal	Contract signature
Benchmark quote against at least two alternatives	procurement	Contract signature

Approval chain

Role	Required	Status
Business owner	Yes	Pending
Security	Yes	Pending
Legal	Yes	Pending

Negotiation points

- 1. Request DPA.
- 2. Benchmark pricing.
- 3. Ask for SOC 2 Type II.
- 4. Negotiate data export rights.

Evidence register

Nine fictional entries. Every source reference below is a placeholder, not a verified source.

ev_cyber_001 / Cybersecurity / Confidence 60

Questionnaire requested but incomplete.

placeholder://questionnaire/acme-payments

ev_privacy_001 / Data privacy / Confidence 75

Payment metadata and customer identifiers require DPA.

placeholder://contract/acme-payments-draft

ev_sanctions_001 / Sanctions / Confidence 80

No sanctions hit in supplied evidence set.

placeholder://watchlist/acme-payments

ev_litigation_001 / Litigation / Confidence 65

No material litigation found.

placeholder://litigation-search/acme-payments

ev_financial_001 / Financial stability / Confidence 55

Private vendor; audited financials not supplied.

placeholder://financial-profile/acme-payments

ev_dependency_001 / Operational dependency / Confidence 75

Service is useful but not merchant of record; exit feasible.

placeholder://business-owner-note/suitescrape

ev_geo_001 / Geographic / Confidence 70

Primary operations listed as United States.

placeholder://vendor-profile/acme-payments

ev_commercial_001 / Commercial / Confidence 80

Quote plausible but not benchmarked.

placeholder://quote/acme-payments

ev_reputation_001 / Reputation / Confidence 65

No severe reputation issue identified.

placeholder://reputation-search/acme-payments
